POSITIONS

MassMutual: Senior Data Scientist

Feb 2017–current

Lead data science projects focused on Sales and Marketing by building state-of-the-art predictive models for customer acquisition and experience. These have included logistic regression, random forest, and neural network models. Serve as a mentor to members of the Junior Data Science program.

University of California Berkeley: Lecturer

Jan 2016–current

Teach, grade, and administer two 15-seat sections of W209: Data Visualization and Communication, a core course in the Master's Program in Data Science (MIDS). Re-developed course content for Fall 2017, including recorded lectures and software tutorials.

University of Vermont: Graduate Lecturer

Aug 2015–Dec 2015

Prepare, teach, grade, and administer two 35-seat sections of non-major calculus (Math 019).

NASA EPSCoR Vermont Graduate Research Assistant

Jan 2012–July 2015

Research in University of Vermont Computational Story Lab.

Utilize the Vermont Advanced Computing Core to perform analyses of large structured data sets (e.g. Twitter gardenhose feed).

Research Experience for Undergraduates in Modeling and Simulation of Biological Systems

Jun 2011

Virginia Bioinformatics Institute, Blacksburg VA

EDUCATION

University of Vermont, Burlington VT

May 2017

Doctorate of Philosophy, Applied Mathematics

Advisors: Dr. Chris Danforth, Dr. Peter Dodds, Dr. Yves Dubief

Concentration: Complex Systems

Dissertations: Towards a Science of Human Stories

University of Vermont, Burlington VT

Dec 2013

Master of Science, Applied Mathematics

Thesis: Predicting Flow Reversals in a Computational Fluid Dynamics Simulated Thermosyphon using Data Assimilation

GPA: 3.85

Virginia Polytechnic Institute and State University, Blacksburg VA

Dec 2011

Bachelor of Science, Mathematics

GPA: 3.64, Summa Cum Laude

PUBLICATIONS

16. The emotional arcs of stories are dominated by six basic shapes

2016

Andy Reagan, Lewis Mitchell, Dilan Kiley, Chris Danforth, Peter Sheridan Dodds

15. Forecasting the onset and course of mental illness with Twitter data

2016

Andrew G. Reece, Andy Reagan, Katharina L. M. Lix, Peter Sheridan Dodds, Chris Danforth, et. al.

14. Simon's fundamental rich-gets-richer model entails a dominant first-mover advantage 2016

Peter Sheridan Dodds, David Dewhurst, Fletcher F. Hazlehurst, Colin van Oort, Lewis Mitchell, et. al.

13. Public opinion polling with Twitter 2016

Emily Cody, Andy Reagan, Peter Sheridan Dodds, Chris Danforth

12. Divergent Discourse Between Protests and Counter-Protests: #BlackLivesMatter and #All-LivesMatter 2016

Ryan Gallagher, Andy Reagan, Chris Danforth, Peter Sheridan Dodds

11. Tracking the Teletherms: The spatiotemporal dynamics of the hottest and coldest days of the year 2016

Peter Sheridan Dodds, Lewis Mitchell, Andy Reagan, Chris Danforth

10. Game story space of professional sports: Australian Rules Football 2016

Dilan Kiley, Andy Reagan, Lewis Mitchell, Chris Danforth, Peter Sheridan Dodds

9. Selection models of language production support informed text partitioning: an intuitive and practical bag-of-phrases framework for text analysis 2016

Jake Williams, James Bagrow, Andy Reagan, Sharon Alajajian, Chris Danforth, et. al.

8. Benchmarking sentiment analysis methods for large-scale texts: A case for using continuum-scored words and word shift graphs 2015

Andy Reagan, Brian Tivnan, Jake Williams, Chris Danforth, Peter Sheridan Dodds

7. Predicting Flow Reversals in a Computational Fluid Dynamics Simulated Thermosyphon using Data Assimilation 2015

Andy Reagan, Yves Dubief, Peter Sheridan Dodds, Chris Danforth

6. Climate change sentiment on Twitter: An unsolicited public opinion poll 2015

Emily Cody, Andy Reagan, Lewis Mitchell, Peter Sheridan Dodds, Chris Danforth

5. The Lexicocalorimeter: Gauging public health through caloric input and output on social media 2015

Sharon Alajajian, Jake Williams, Andy Reagan, Stephen C. Alajajian, Morgan Frank, et. al.

4. Reply to Garcia et al.: Common mistakes in measuring frequency dependent word characteristics 2015

Peter Sheridan Dodds, Eric Clark, Suma Desu, Morgan Frank, Andy Reagan, et. al.

3. Human language reveals a universal positivity bias 2015

Peter Sheridan Dodds, Eric Clark, Suma Desu, Morgan Frank, Andy Reagan, et. al.

2. Collective Philanthropy: Describing and Modeling the Ecology of Giving 2014

William L. Gottesman, Andy Reagan, Peter Sheridan Dodds

1. Shadow networks: Discovering hidden nodes with models of information flow 2013

James Bagrow, Suma Desu, Morgan Frank, Narine Manukyan, Lewis Mitchell, et. al.

SELECTED PRESENTATIONS

The emotional impact of words: comparison, critique, and benchmark of major data sets

Computer Science Research Days, UVM, Burlington VT

Sep 2015

Thermosyphon flow prediction: predicting flow reversals in a computational fluid dynamics simulated thermosyphon using data assimilation

SIAM Dynamical Systems, Snowbird UT

Jun 2015

Shapes of stories: characterizing the emotional trajectories of stories into a hierarchy of basic shapes

UVM Student Research Conference, Burlington VT

April 2015

d3.js: javascripting and data visualization

VT Coders Meetup, Winooski VT (60+ attendees)

Nov 2014

Climate Parameter Estimation with DA and Genetic Algorithms

UVM Computational Storylab Group, Burlington VT

Feb 2014

Making Beautiful Web Graphics with D3 + MATLAB

UVM Student Complexity (and Pizza) Seminar, Burlington VT

Jan 2014

Thermosyphon Flow Prediction

Master's Thesis Oral Defense, Burlington VT

Dec 2013

An Introduction to \LaTeX

UVM Grad College Professional Development Seminar, Burlington VT

Jan 2013

Understanding the Natural Structure of Human Logic

Student Complexity Research and Pizza Seminar, Burlington VT

Oct 2012

Uncertainty of Rogue Wave Formation in the Nonlinear Schrödinger Equation

UVM Computational Storylab Group, Burlington VT

Oct 2012

A Computational Approach to Iron Metabolism in Breast Epithelial Cells

Joint Mathematics Meeting, Boston MA

January 2013

Mathematically Informed Hypothesis Generation for Cancer Proliferation

Modeling and Simulation in Systems Biology REU

August 2011

Symposium, Blacksburg VA

PRESS

Researchers have quantified what makes us love Harry Potter

Wired Magazine, July 17, 2013

HONORS AND AWARDS

SIAM Student Travel Award for Conference on Applications of Dynamical Systems	2015
University of Vermont Featured Graduate Student	2014
Virginia Tech Dean's List, Every Semester attended	2008-2011
Earned Pratt Engineering Scholarship	2010
Earned Virginia Tech Scholars Scholarship	2008-2009
Earned P&C Foods Scholarship	2008
Sam Walton Community Scholar	2008
National Merit Scholar	2007
OCMTA Mathematics Contest Winner	2007

TEACHING

Course	Section	Duties	Offered	Overall Rating	Difficulty Rating
UCB W209	1	Teach & Grade	Summer 2016 7PM	(Will make available)	
UCB W209	3	Teach & Grade	Summer 2016 7PM	(Will make available)	
UCB W209	1	Teach & Grade	Spring 2016 7PM	5.70 / 7	-
UCB W209	3	Teach & Grade	Spring 2016 7PM	5.89 / 7	-
UVM Math 19	E	All	Fall 2015 10:15AM	4.26 / 5	3.39 / 5
UVM Math 19	F	All	Fall 2015 8:00AM	3.50 / 5	3.05 / 5
UVM CSYS 300	-	DoT (Grading)	Fall 2014	-	-
UVM Math 266	-	Grading & Sub	Spring 2014	-	-
UVM CSYS 300	-	DoT (Grading)	Fall 2013	-	-

SERVICE

Advisor for undergraduate students in Math 52 final projects	2015–current
Vermont Advanced Computing Core documentation and tutorials	2015–current
Complex Systems website database design, construction, administrator, and front end	2014–current
UVM Mathematics Department Graduate Committee	2013-2014
Student Complexity Research [and Pizza] Seminar (SCRaPS) Organizer	2013–2014
Volunteer at Bike Recycle Vermont	2013
Cycled across the USA with Bike and Build, benefiting Habitat for Humanity	2010

- My trip alone donated close to \$90,000 to affordable housing and spent 10 days building with Habitat affiliates
